MF10 Protein Separation System

One small step for a protein, one GIANT leap for proteomics

The NuSep™ MF10 is the first bench-top instrument to use 2D-PAMS (*poly-acrylamide membrane separation*) to separate proteins by charge and size. Now protein samples can be prepared for 2D-PAGE or MS, by fractionation, desalting, and depletion with an affordable instrument.

- 1-2 samples per process
- Multiple fractional separations (2-8 fractions) on the basis of charge and size
- Sample volumes from 50µl-200µl
- Fractions from 50µl-500µl
- Compatible with conventional analytical methods 1D-PAGE, 2D-PAGE, IEF, and MS
- Analysis over a wide pH range, 3-10
- 'Native' protein preparations
- Fractionation under a variety of denaturing conditions, allowing for structural or quantitative proteomics studies
- Rapid de-salting of samples
- High recovery from very small samples
- Flexible separation conditions
- 5kDa to 500kDa range
- Rapid process times

TC-3000 Series Thermal Cylers

Proven performance in DNA amplification

Techne has expanded the TC-3000 range to include the larger capacity TC-3000X and a new gradient cycler, the TC-3000G.

- Exceptional block uniformity of less than $\pm 0.2^\circ\text{C}$ at 50°C ($\pm 0.1^\circ\text{C}$ for the TC-3000).
- Fast heating rates of up to 3.6°C/sec for quick sample ramping (for TC-3000X & TC-3000G).
- Fast and intuitive programming with speed dial for locating programs quickly. Stored, ready-to-go templates for standard protocols and password protection for security.
- Each of the three units has the same small footprint, making the TC-3000G the smallest gradient cycler in the world.

TC-3000G

The world's smallest gradient cycler, the TC-3000G with 0.2ml block holds half a 96-well plate, in a horizontal format so that it offers 8 columns for temperature optimization and 6 rows for optimizing reagents such as MgCl_2 and primer concentrations. Annealing temperatures can be optimized over a 15°C gradient between the temperatures of 20°C and 80°C . Also available with a $30 \times 0.5\text{ml}$ block.

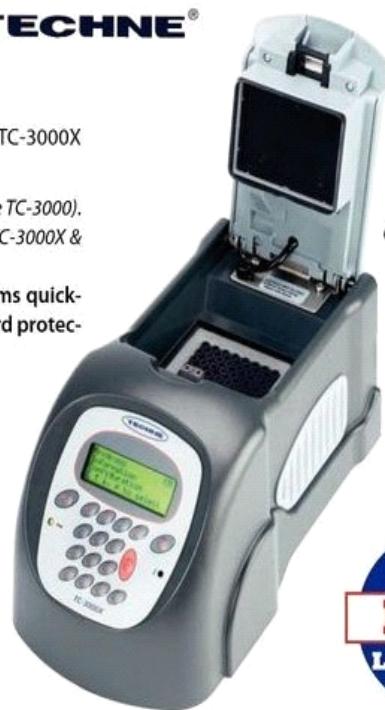

Communications

All units can be connected to a PC and controlled by the new Gensoft PC software, with up to 32 cyclers being linked together. The TC-3000X and G models communicate via a USB port and the TC-3000 via RS232.

Lid

The heated lid is automatically disabled for incubations below 35°C to protect the sample. The lid can also be manually disabled at any temperature, if required. TC-3000X and G models have fully adjustable, defined pressure heated lids to accommodate a multitude of consumables, whereas the TC-3000 has a sprung lid to allow any 0.2ml or 0.5ml tube to be used.

P-6204-205	TC-3000 Thermal Cycler, 20 x 0.5ml block	\$3,069.00	\$2,779⁰⁰
P-6204-252	TC-3000 Thermal Cycler, 25 x 0.2ml block	\$3,069.00

Water Jacket CO₂ Incubators

- 19 gallon water jacket
- CO₂ sample port/data logger connections on front control panel for quick and easy access
- Coved corners for easy cleaning
- Anti-corrosion anode for tap water use
- Patented copper-housed HEPA® filter for superior contamination prevention
- Built-in CO₂ tank switcher
- Factory pre-set door thermostat
- Pre-heated CO₂ gas inlet increases temperature uniformity and eliminates dead zones

Multi-tiered Limited Warranty

- 5-year overall
- 7-year on infrared CO₂ sensor
- Lifetime on water jacket integrity

311DS Digital Shaking Incubator

The 311DS is a high performance incubator with a built-in orbital shaker. A broad temperature range expands the use of this incubator to liquid cultures, blot washing, and other shaking applications requiring strict temperature control. The incubator is supplied with one shelf.

- Built-in shaker with 19mm orbit, 20 to 300rpm
- Exclusive SmartChek™ temperature control system
- Broad temp. range meets a wide range of applications
- Switchable turbo fan for mechanical or gravity convection
- 1-year warranty

**Ideal for growing
up proteins!**

All Lab Companion Shakers Feature:

- Dual motion control (*orbital and reciprocal*)
- Microprocessor control with digital display of speed, time, and temperature
- Programming for time, speed, and motion control
- Virtually vibration-free movement
- Wait On/Off feature allows programming of temperature over numerous steps and cycles
- Gentle start and stop with smooth operation even at 10rpm for gentle shaking protocols
- RS232 communication port (*SI series models*) with PC communication software (*Lab Tracer*)
- Accessories for a wide range of shaking applications
- CLS control system provides independent microprocessor safety controls

Analog Incubator

Ideal for general use and as a backup incubator for hospitals, this economy model offers superior value for a wide range of routine applications. Two shelves included.

Floor Model Incubator Shaker

I-5101-1 IS-971 \$8,065
I-5101-1R IS-971R \$9,360

Floor Model Features:

- Digital PID microprocessor controller
- Patented safety system exceeds DIN Class 2
- Chamber volume: 250L
- Temp. range: Amb. +5°C (IS-971), +4°C (IS-971R), to 60°C
- Auto tuning and bias function (*internal sensor calibration*)
- 999 hrs. run time with time delay options
- Door and over temperature alarms
- Shaking amplitude 30, 40, 50, 60, and 70mm
- RS232 and LabTracer software
- 10-300rpm speed with optoelectronic feedback
- Programmable motion—clockwise, counter, and pause
- Available flask clamps, platforms, spring wire rack, test tube rack, rubber mats, & more
- 2-year limited warranty**

Analog Incubator

Drummond Portable Pipet-Aid® XL

New Ergonomic Design Reduces Fatigue When Pipetting Under a Hood

- Longer lightweight handle lowers your arm position to reduce head, neck, and upper arm strain
- New quiet, more efficient pump reduces noise and extends operation period between charges
- Ni-MH battery can be charged while in use to eliminate downtime
- Three speed settings provide more precise control for both aspirate and dispense modes
- Accepts 1 to 100ml pipets
- Weight: 8 oz.

The Portable Pipet-Aid XL has an ergonomic design which includes an adjustable sliding hand rest and a removable stand that enables the unit to be set down without contaminating the pipet. The unit is supplied complete with power supply/charger, 4 extra filters, and a holster-type wall bracket.

Revolver Rotator

360° Superior Sample Mixing!

- 0-90° mixing angle
- 360° rotation
- Interchangeable rotisserie options for all common lab tubes
- Independently adjustable rotisseries
- Cold room and incubator compatible
- Includes 36-place rotisserie for 1.5/2.0ml tubes

The Revolver Rotator accepts a variety of tube sizes and mixes them horizontally, vertically, or anywhere in between. Changing the mixing angle is easy - simply turn the rotisserie. No tools are required.

Interchangeable rotisseries accept tubes from 1.5ml to 50ml. Each rotisserie is split into two halves - the halves can be exchanged to mix more than one tube type at the same time. Each rotisserie half can be rotated independently from a center point on the shaft. Placing the halves in line with the shaft produces an end over end tumbling motion, like to that used to mix blood tubes. Rotating the rotisserie at the right angle to the shaft produces a gentle mixing motion, ideal for delicate samples. Any position in between these two extremes may be selected to achieve the desired mixing action. Rotation speed is fixed at 18rpm.

The Revolver can be used in ambient temperatures from +4°C to 65°C, making it ideal for a variety of applications in Molecular Biology, Biochemistry, and Histochemistry. Small enough to fit on a crowded bench, the rotator is easily moved where it is needed - the bench, cold room, incubator, or biological hood.

H-5600	Revolver Rotator with rotisserie for 36 x 1.5/2.0ml tubes	\$395.00
H-5600-15	Rotisserie for 10 x 15ml tubes & 16 x 5/7ml	\$40.00

Deluxe ProBlot™ Rocker 35D

Labnet
Labnet International, Inc.

Speed range: 4-160 tilts per minute
Timer: 2 hour with "hold"
Motion: Tilting ($\pm 20^\circ$), Adjustable
Max. load: 15.4 lbs
Platform Dim. (WxD): 35.6 x 28cm

- Staining, hybridization, immunoblotting, etc.
- Nonslip rubber mat
- Safe for cold room or incubator use

S-2035-D Deluxe ProBlot Rocker 35D
with Double Platform \$867.00

Promo
code:
CG20
or STAR-20

GyroMini™ Nutating 3-D Shaker

- Gentle mixing without foaming
- Dimpled mat
- Cold room usable

Speed range: 24rpm
Motion/Pitch: 3-D/fixed 20°
Maximum load: 1.75 lbs.
Operating range: 4° to 65°C
Dim. (WxDxH): 9.75" x 7.5" x 7"
Weight: 1.9 lbs.

S-0500 GyroMini 3-D Shaker with dimpled rubber mat \$410.00

Mini LabRoller™ Rotator

- Wide selection of motions (*rotating, rocking, & tumbling*)
- Cold room & incubator compatible (ambient +4° to 65°C)
- Rocking action using supplied pegs at 20°, 45°, or 60°
- Speed: 24rpm
- Rotisseries can be used as rocking platforms
- Weight: 4 lbs.
- Dim. (WxDxH): 8.4" x 4" x 5"

H-5500	Mini LabRoller Rotator with rotisserie for 36 x 1.5/2.0ml tubes	\$375.00
H-5500-15	Rotisserie for 10 x 15ml (15-17mm dia.) conical tubes & 12 x 5ml (12-13mm dia.) tubes	\$37.00
H-5500-50	Rotisserie for 6 x 50ml conical tubes	\$37.00
H-5500-02	Rotisserie for 36 x 1.5/2.0ml microtubes	\$37.00

**ProBlot™
Rocker 25**

Speed settings (rpm):
8, 14, 18, 22, 30, and 44
Max. load: 11 lbs.
Operating range: 4° to 65°C

- Variable speed provides gentle motion for staining gels or vigorous motion for washing blots

R-2025	ProBlot Rocker 25 with Single Platform (26 x 20cm)	\$625.00
R-2025-D	ProBlot Rocker 25D with Double Platform	\$720.00

Hermle Z216 MK Refrigerated Microcentrifuge

In spite of its remarkably small footprint, the Z216 MK has a powerful brushless motor and cooling capacity to spare. A newly designed LCD control panel provides intuitive control over all operating parameters, including the "Quick-COOL" feature, for rapidly cooling the rotor chamber (cools to 4°C in less than 12 min. from 23°C ambient). Six available rotor options permit running a variety of tubes from 0.2 to 2.0ml.

- Pre-selection of rotor code for proper g-force conversion
- Permanent indication of preset and actual values
- Control over all settings with one ergonomic adjustment knob
- Accelerates to max speed in under 18 sec. (deceleration: 16 sec.)
- A powerful refrigerator system: -20° to +40°C
- Program storage of up to 99 runs
- High speed: 21,380 x g
- 2-year warranty
- Rotors:
44 x 1.5/2.0ml, 13,500rpm/17,720 x g
24 x 1.5/2.0ml, 15,000rpm/21,380 x g

See web for additional rotor options.

Prism™ R Refrigerated Microcentrifuge

- "Quick-COOL" function cools the rotor to 4°C in 8 minutes
- Powerful motor drive runs samples as high as 17,135 x g
- Accelerates to max. speed in under 16 sec. (deceleration: 18 sec.)
- Solid aluminum rotor (24 x 1.5/2.0ml) with easy access design
- User-friendly control with large LCD display
- Imbalance identification system with automatic shut-off
- Quiet operation, less than 56 dBA at maximum speed
- Powerful refrigeration-temperature control from -10°C to 40°C
- Maintains 4°C at maximum speed (13,500rpm/17,135 x g)
- 0.5 to 99 minute timed, continuous, or Quick Spin modes
- Set and view speed in rpm or rcf
- Brushless motor for maintenance free operation
- Extremely compact (WxDxH) 10.9 x 17 x 9.75 inches / 44 lbs.
- 2-year warranty

The unique design of the 24-place rotor allows easy access to the tops of sample tubes. Individual tube slots in the solid aluminum rotor support the tubes along their length and contain sample in the event of tube failure. The rotor accepts 1.5/2.0ml tubes directly and smaller tubes through the use of adapters, sold separately.

PCR Workstations**AirClean Systems****Get the results you expect - the first time!**

AirClean® Systems PCR Workstation with UVTECT™ microprocessor control allows you to maintain a clean work area during PCR preparation. The AC600 Series Model LFUVC has a built-in 254nm ultraviolet light that allows the operator to irradiate tubes, flasks, and pipettes between amplifications. The 254nm ultraviolet light will effectively destroy potentially contaminating DNA and RNA within minutes. UVTECT monitors the life of the bulb to ensure proper levels of irradiation.

**Standard Features:**

- Class 100 vertical laminar flow
- Bi-fold sash with safety interlock eliminates UV irradiation leaks
- 360-degree visibility
- Integral polypropylene base for easy cleaning
- Low profile and tall version designs using all thermoplastic construction
- Built-in fluorescent light
- Removable shelf with pipettor rack
- Optional sturdy cart
- Polycarbonate surround construction—eliminates cracking and yellowing common with acrylic

Bundle Packages include:

- Pack of 4 UV Bulbs (est. 1 yr. supply)
- Pack of 12 Prefilters (est. 1 yr. supply)
- Removable shelf
- Power cord access port

Tris-compatible pH Meter & Probe

- Simple one-button standardization
- Automatic electrode checking
- Easily enter one to three buffers
- Auto-buffer recognition

Ultra micro Tris-compatible electrode. Able to fit in a 1.5ml tube.

- pH range: 0.00 to 14.00
- pH resolution: 0.01
- pH accuracy: 0.005
- Temp. range: 0.0 to 100.0°C
- Temp. resolution: 0.1°C
- Temp. accuracy: 0.2°C
- mV range: -1800.0 to 1800.0
- mV resolution: 0.1
- mV accuracy: 0.2mV or ± .05%
- Dim. (LxWxH): 9" x 4.8" x 3.1"
- Weight: 0.6 lb
- 2-year warranty

TG-Series Analytical and Toploading Balances

- Budget conscious price.** The TG-Series balance is the economical solution with all the required features for straight-forward weighing, no more, no less.
- Easy operation.** Large "TARE" key provides quick zeroing of the balance. Basic weighing is effortless. Use "FUNCTION" key to toggle between weigh units or applications.
- Electronic filtering.** Ambient condition settings allow the operator to adjust the balance to provide optimal performance in less than ideal environments (draft and vibrations).
- Percent weighing.** The versatile features of these balances allow measurement of a percent proportional to a reference weight. Eliminate human errors by seeing the weight increase or decrease in percentage points instead of typical weighing units.

Meridian Benchtop Electrochemistry Meter

Compliance made easy-and affordable!

Meridian meters ensure that your measurements are in compliance with GLP/GMP, ISO and 21-CFR, Part 11 standards. Available data include: time, date, model, meter serial number, electrode serial number, slope efficiency, pH readings, mV readings, mV offset, and calibration history.

- Easy 1-2-3 standardization
- Simple menu navigation
- Automatic buffer recognition
- Automatic electrode test
- Automatic temperature compensation (ATC)
- Data logging of up to 500 results
- RS-232 serial interface for data output
- GLP-Clip safeguards calibration data
- Data collection facilitates compliance
- Calibration reminder
- Measurement lock option

Micro & MaX-Homogenizer Packages

The PRO200 homogenizer is ideal for microprocessing in 0.5ml, 1.5ml, or 2.2ml microtubes. The Micro-Homogenizing Packages include the PRO200 homogenizer and the industry's smallest generator, the 5 x 75mm generator — volumes as small as 0.03ml can be easily processed in a matter of seconds.

Micro-Homogenizing Packages

Standard: Includes PRO200 homogenizer, tool kit, 5 x 75mm flat-bottom generator

Deluxe: Adds 7 x 75mm saw tooth bottom generator

Premium: Adds PRO200 stand assembly

MaX-Homogenizing Package: Ideal for 15-50ml round bottom or conical tube processing.

Includes: PRO200 homogenizer, tool kit, and 10 x 115mm saw tooth bottom generator

Buy a 130 or 500-Watt Ultrasonic Processor (S-2034-130 or S-2028-505) to receive 50% OFF a Sound-abating enclosure! (must request at time of order)

Temperature controller and 750-watt models available online.

130-Watt Ultrasonic Processors

130-Watt Ultrasonic Processors

- Process samples from 150µl to 150ml
- Monitors the power in both watts and joules
- Ideal for cell disruption, sample preparation, or homogenization
- Microprocessor controlled, timer from one second to 10 hours plus pulser
- Automatic tuning circuitry eliminates the need for constant adjustments
- Dim. (HxWxD): 4.5" x 9.75" x 12.5"
- Weight: 7 lbs.

The variable power output control allows the ultrasonic vibrations at the probe tip to be set to any desired amplitude. Units include a tool kit, instruction manual, converter, footswitch connector, and 6-ft power cord. Includes a 6mm (1/4") titanium probe which may be substituted upon request (see website for complete listing).

500-Watt Ultrasonic Processors

- Automatic tuning circuitry eliminates the need for constant adjustments
- Ideal for low- and high-volume applications
- Monitors the power in both watts and joules
- Process samples as small as 250µl
- Programmable, microprocessor-based 1 sec. to 10 hour timer
- Variable amplitude control adjusts cavitation energy
- Full-function pulser protects temperature-sensitive samples
- Dim.: (HxWxD) 9.25" x 7.5" x 13.5"
- Weight: 15 lbs.

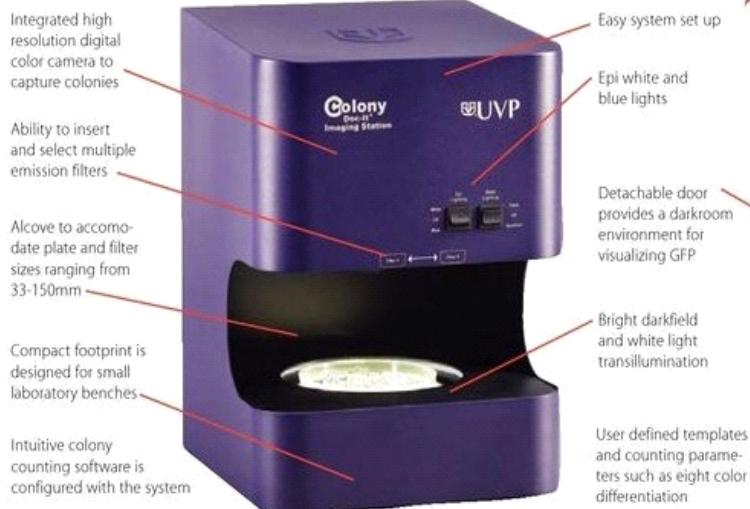

Includes converter, tool kit, footswitch port, 13mm (0.5") titanium probe with replaceable tip, and 6-ft power cord. (See website for complete listing, additional probes, accessories, and 750-watt models.)

ColonyDoc-It™ Imaging Station

Automated colony counting just got easier!

Uses and Applications
The station is designed to automatically count bacterial, yeast, and mold colonies and decrease the time to count plates. Colony samples are found in air, water, food, and cosmetics.

Applications include:

- Fluids contamination
- Microbiology studies
- Antibiotic testing
- Hygiene studies

The intuitive user interface enables users to quickly capture and count colonies.

- Simply...**
1. Place the colonies in the station and turn on the appropriate light.
 2. Capture a high resolution colony image.
 3. Click a button to automatically count the colonies.

It's that simple! Once the colony plate is illuminated, the software interface controls the camera for fast image capture. Click the start colony counting button to enable automatic colony counting.

U-2289-1	ColonyDoc-It Imaging System, includes Darkroom/Camera/Software	\$7,395.00
U-2289-2	Filter, GFP (Green Fluorescent Protein)	\$995.00
U-2281-3	Thermal Printer, Mitsubishi Digital, 115V	\$2,135.00

Digital Hot Plates and Stirrers

CORNING

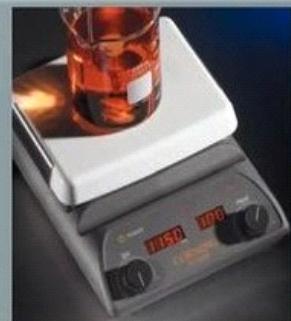

Microprocessor temperature and stir control with digital display have been added to the Pyroceram®-topped Corning plates that have set the standard for quality for over 40 years.

Precise liquid temperatures and stirring speeds

- Temperature accuracy within $\pm 2^{\circ}\text{C}$ and stirring speeds at $\pm 5\%$ of the speed setting you choose
- Optional external temperature controller truly controls solution temperature inside the vessel.

Safety indicators

- Power button and hot top indicators warn if unit is plugged in or is too hot to touch.
- Bright LED HOT TOP icon lights up when top plate temperature is over 60°C , even when heat control is turned off.

Pyroceram is a registered trademark of Corning Inc.

Alphalmager® Mini

**Alpha
Innotech**

Alpha Innotech's Alphalmager Mini offers powerful imaging capacity by utilizing a scientific grade camera providing 1.3 million pixel images, and streamlined AlphaSnap™ software, all in a compact system contained in a new, 14 lb cabinet.

While this system requires very little bench space, it images a variety of fluorescent DNA and protein stains. Designed for rapid gel imaging, the Alphalmager Mini is ideal for daily fluorescent and colorimetric research applications.

Cabinet features

- Viewport with UV blocking shield. The Alphalmager Mini cabinet features a viewport that allows the user to safely view their sample under UV illumination.
- Large pull up door with static hinges allows easy access when positioning or removing sample in cabinet.
- Dual wavelength transilluminator (*optional*) provides optimal excitation of a variety of fluorescent dyes. High and low intensity settings offer additional control over UV illumination.
- On/Off switch for the epi white light source.
- Handle on either side for easy placement or transfer of cabinet. Base seats securely over the transilluminator casing.
- Epi white light illumination. The cabinet houses an external switch for epi white lights to assist the user when focusing on a sample.

Camera features

- 1.3 million pixel, scientific grade camera for high quality images
- USB 2.0 connection for fast data transfer
- F1.2 zoom lens for adjusting both zoom and focus

Cat. No.	Description	Price
U-2325-9	Alphalmager Mini Unit <i>Includes:</i> 1.3MP USB 2.0 scientific-grade camera with zoom lens; AlphaSnap acquisition software; Image 250 Cabinet with view port and epi white lights; standard Orange filter.	\$3,800.00

AlphaDigiDoc® Pro Imaging System

The AlphaDigiDoc Pro is an easy-to-use documentation system that captures sharp, high resolution black and white or color images.

Rapidly capture your images with the high resolution AlphaDigiDoc Pro.

Its industry leading-features include:

- 10 Megapixel camera for superior, sharp images
- Adjustable LCD screen for real time viewing of the sample from any angle
- "Snap and Fit" assembly of the system for easy installation
- Camera is pre-assembled to easily attach to the hood's quick-fit connector
- Filters, close-up lens, and extender are also pre-assembled into one piece for easy set-up
- Comes standard with an Orange Filter 590/55nm designed for Ethidium Bromide applications

To Order Call: 1-877-897-6261

red™ personal gel imager

red boasts integrated UV transillumination, epi white light sources, and a 3-position filter wheel. These features are designed for excitation and imaging of a wide range of UV fluorescent labels as well as white light applications.

Combining advanced imaging technology with an integrated on-board computer in a compact unit, **red** is ideal for 1-D gel imaging.

- Simple one button power switch to wake **red** up, and auto-load the acquisition software.
- 1.4 million pixels, scientific grade camera for high resolution images.
- Motorized optics for complete image acquisition control.
- Epi white LED lights for sample positioning, focus, and white light applications.
- 3-position filter wheel provides dye flexibility for fluorescent applications.
- Networkable for easy saving and transferring of images across a network.
- Safety switch protects users from UV exposure when opening the door.
- Side USB port directly connects a USB-compatible printer for quick printing.
- Front USB port for quickly saving images to a USB memory stick.
- Small foot print of 10.6 x 21.65 x 21.65 inches (WxDxH)

Goodbye Polaroid®

instant film,

Hello **red**™

Applications:

Fluorescence: Ethidium Bromide, SYBR® Green, SYBR Safe, Hoescht Blue, and more
Absorbance / colorimetry:

Coomassie® Blue or silver stained protein gels, colony plates

Refrigerators & Freezers

- Designed specifically to withstand the rigors of research laboratory use
- **Warranty covers commercial laboratory use, unlike household models**
- Built-in door lock (17 and 20 ft. models only)
- UL® certified for commercial applications

What is EnergyStar?

- A partnership among government and business, united in the pursuit of a common goal—to protect our environment for future generations
- A powerful platform for improving the environment through energy efficiency
- Program administered by the EPA and DOE
- Standard for Commercial refrigerated products

Environmentally Friendly Product

Save money and help the environment—go Energy Star!

"Americans, with the help of ENERGY STAR, saved enough energy, in 2007 alone, to avoid greenhouse gas emissions equivalent to those from 27 million cars — all while saving \$16 billion on their utility bills.*"

Biowave DNA
Life Science Spectrophotometer

A dedicated life science based instrument with stored routines for nucleic acid quantification/proteins/cell density measurements.

- Novel Gifford optics for high energy combined with a xenon source for long lamp life
- Simple selection software with 9 stored methods for life science applications
- Unique, integral cuvette tray for storage of expensive cells and support of valuable samples
- Full graphics display
- DNA and RNA region scans for purity checking
- Integrated printer model on special for a limited time
- 1-year warranty

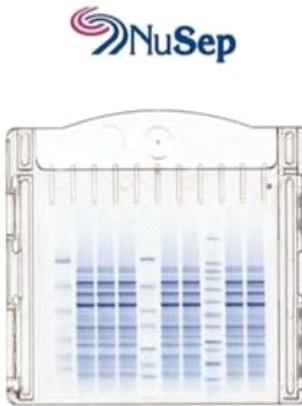

The stored methods include DNA and RNA calculations, protein assays such as BCA, Biuret, Bradford, and Lowry, and cell density measurement. Unlike many life science based instruments there is no wavelength limitation with the Biowave DNA so there is complete flexibility for future applications. Capable of nucleic acid profile scan display of RNA samples to show possible impurities in the 230nm region that don't affect on the A260/A280 ratio. The system is compatible with disposable low volume UV cuvettes. Results may be printed to an optional integrated high quality printer for a permanent record or via a USB connection to a suitable PC.

NUView iGel Precast Gels

- No combs to remove
- Pre-numbered wells
- No tape to remove
- Includes NUView in-gel UV protein stain

These iGels are the ultimate in convenience. Improved iGels now incorporate NUView UV protein visualization. NUView is a patent pending UV based stain. You can visualize your proteins within two minutes of completing a run and this visualization does not change or interfere with any other downstream process. iGel cassettes are engineered to fit straight into your existing gel system. The 10, 12, or 15 pre-numbered sample wells are formed into the cassette, so you never have to remove a comb. iGels are available in 5 different concentrations, for 6.5kDa to 205kDa proteins. View bands on UV Transilluminator immediately after running.

NUView LongLife Gels

- Includes NUView in-gel UV protein stain

With a 24-month shelf life, these gels also offer:

- Shorter run times: Cut run times in half—45 minutes or less for a typical run!
- Faster transfer times: A semi-dry blotting protocol in as little as 30 minutes!

Traditional SDS-PAGE gels are prone to hydrolysis of polyacrylamide to acrylic acid over time. This hydrolysis results in an increase in pH and instability of the gel that decreases the resolving capacity.

With a Tris-HEPES running buffer system that extends stability, you get a faster running gel (*as little as half the running time of our standard iGels*) with equally excellent resolution.

RedTrack™ and GreenTrack™ Precast Agarose Gels

Goodbye Ethidium Bromide!

New RedTrack and GreenTrack Precast Gels use newly developed staining substances to provide superior imaging without using ethidium bromide or unstable SYBR® green.

Safer to Use

- RedTrack and GreenTrack stains showed undetectable mutagenicity and toxicity at working concentrations in Ames Test assaying.
- Four sided ultra-clear UV transparent tray ensures gel integrity and easy handling.

Yields High Quality Results

- Significantly sharper bands than using ethidium bromide
- 10-50 times higher sensitivity to DNA/RNA with very clean background
- Requires minimal amount DNA: as little as 1.7ng per lane for genomic DNA and 4.0ng for 10bp.
- Simple access for DNA recovery
- DNA/RNA bands can be observed within 15 minutes.

Provides Consistent Results

- Undetectable DNase and RNase
- Consistent gel concentration
- Eliminate gel handling-related contamination and damage
- Avoids problems with SYBR green temperature stability

Universal Application

- No need to change the filters: RedTrack Precast Gels can be analyzed with standard UV transilluminators or SYBR readers.
- GreenTrack Precast Gels can be analyzed under SYBR readers, 254nm UV transilluminators, or 488nm laser based gel readers.

EZ-Vision™ DNA Dye as Loading Buffer

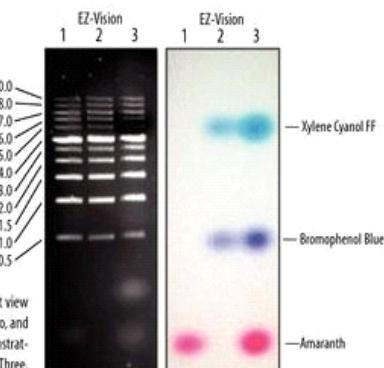

Safe, non-hazardous alternative to ethidium bromide

AMRESCO's EZ-Vision is a fluorescent DNA reagent that enables instant band visualization during or immediately after running your agarose gel. EZ-Vision provides a faster, safer, environmentally friendly alternative to ethidium bromide.

- Instant band visualization – See your DNA bands immediately after electrophoresis
- Time saving – Simply mix with DNA sample, run on gel, and immediately visualize bands on a UV transilluminator
- Safe – EZ-Vision is non-mutagenic in Ames tests performed by an independent testing laboratory.
- Environmentally friendly – No hazardous chemicals
- Convenience – Supplied in 6X loading buffer, contains three tracking dyes
- Economical – No hazardous shipping, storage, or waste charges

amresco®

Three different tracking dye versions now available!

Are you getting the results you deserve, by using the right agarose for the job?

GENE^{PURE}TM Sieve GQA Low Melt Agarose

GenePure Sieve GQA Agarose is our most popular and highest quality low melting temperature agarose with the highest resolving capacity for DNA fragments. This agarose is Genetic Quality Analyzed (GQA) and carries that certification. This ensures that in-gel applications can be performed in remelted agarose, avoiding difficult DNA extraction steps.

GenePure Sieve GQA agarose is ideal for digestion by agarose enzymes, making it very easy to recover large DNA fragments suitable for cloning or enzymatic processing. It can also be used at high concentrations, forming gels with excellent clarity and a higher sieving capacity than standard melting agaroses. GenePure Sieve GQA gels are very easy to handle, even at concentrations as low as 2%.

E-3112-25	GenePure Sieve GQA Agarose	25g	\$99.85
E-3112-125	GenePure Sieve GQA Agarose	125g	\$343.20
E-3112-500	GenePure Sieve GQA Agarose	500g	\$1,066.00

Moisture	≤ 5%
Ash	≤ 0.3%
EEO	0.10
Sulfate	≤ 0.12%
Gel Strength (4%)	≥ 1000g/cm ²
Gelling temp (4.0%)	≤ 35°C
Melting temp (4.0%)	≤ 65°C
DNase/RNase activity	None detected
DNA Binding	None detected
In-gel enzymatic processing	Passes test
Enzymatic degradation by agarose	Passes test
<i>Genetic Quality Testing Certified</i>	

Applications:	3% Sieve GQA in 1X TBE buffer. Lane A: Hoe III digest ox174 Lane B: Msp I digest pBR322 Lane C: 100bp ladder

Gel Strength (3.0%)	≥ 1500g/cm ²
Gelling temp (3.0%)	≤ 35.5°C
Melting temp (3.0%)	≤ 80°C
Ranges of separation (1.8%)	400-1200bp
Ranges of separation (3.0%)	150-800bp
Ranges of separation (4.5%)	50-400bp
DNase/RNase activity	None detected
DNA Binding	Very low
DNA resolution	Finely resolved

3% HiRes in 1X TAE buffer run 180min
at 100volts.
Lane A: Markers
Lane B: 500bp ladder
Lane C: 25bp ladder

GENE^{PURE}TM HiRes Agarose

GenePure HiRes Agarose is specifically formulated for separation and resolution of small DNA fragments. At a 4% concentration gel with a TBE buffer, one can separate small fragments as little as 4bp apart.

The main properties of GenePure HiRes Agarose are:

- High resolution of PCR and DNA small fragments
- Improved clarity of the gel, enhancing visibility
- Better handling than competitive products because of stronger gel structure and higher gel strength

E-3115-25	GenePure HiRes Agarose	25g	\$130.00
E-3115-125	GenePure HiRes Agarose	125g	\$364.00

GenePure™ LE & LE Quick Dissolve Agarose

GenePure LE is our most popular agarose and is formulated specifically for analysis of nucleic acids using standard electrophoretic techniques. GenePure LE features a low EEO value for high electrophoresis mobility. Further, you can depend on reproducible results from one lot to the next.

GenePure LE Quick Dissolve: Our best-selling agarose now comes with a faster dissolving time than our standard GenePure LE. GenePure LE Quick Dissolve is ideal for routine DNA analysis with the same dependable features as our standard GenePure LE agarose.

- Extraordinary mechanical resistance for reliable and easier handling
- Excellent transparency of the gels
- Greater thermal stability

Applications:

- Analytical electrophoresis
- Excellent for all blotting applications
- Excellent for DNA typing
- Exceptionally low background of staining agents

LE Specifications:

Moisture	≤ 7%
Ash	≤ 0.4%
EEO	0.05-0.13
Sulfate	≤ 0.1%
Clarity (NTU)	≤ 3.0
DNase/RNase activity	None detected
DNA Resolution ≥ 1000bp	Finely resolved
Gel Strength (1.0%)	≥ 1200g/cm ²
Gel Strength (1.5%)	≥ 2500g/cm ²
Gelling temp (1.0%)	≤ 36±1.5°C
Melting temp (1.0%)	≤ 88±1.5°C
Gel background	Very low

Ready Ladder™

DNA Markers in Loading Buffer - Ready-to-use!

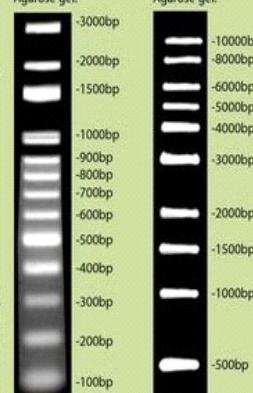

AMRESCO's popular 100bp Ladder and 1kb Ladder are now available in 1X Loading Buffer for agarose gel electrophoresis

- Easy-to-use: Simply load 6µl per lane
- Quality: Loading buffer includes 15% Ficoll® with 3 tracking dyes migrating at 10,600 and 4000bp on 1% agarose gels.

100bp Ladder
Resolution of the 100bp DNA Ladder on a TAE/2% Agarose gel.

1kb Ladder
Resolution of the 1Kb DNA Ladder on a TAE/0.5% Agarose gel.

Cat. No.	Description	Size	Price
N550-300UL	DNA Markers in Loading Buffer, 100bp ladder, 13 bands from 100-3000bp	300µl	\$67.10
N551-600UL	DNA Markers in Loading Buffer, 1kb ladder, 11 bands from 500-10000bp	600µl	\$67.00

Premium Screw Cap Microcentrifuge Tubes & Caps

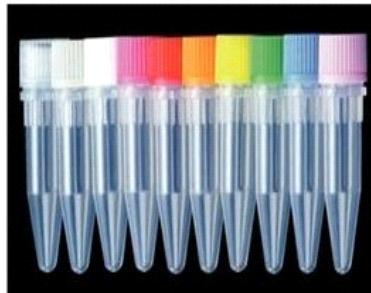

Whether it's collection, processing, centrifugation, or long-term storage, our premium screw cap tubes keep your samples safe.

- Rated to -80°C
- No more leaks
- No more cracks
- 20,000 RCF rated
- Ideal for packing/shipping of restriction enzymes and other reagents
- Color-coded caps with o-rings provide a syringe port that is easily pierced for fraction collecting and radioisotope labelling
- Pre-sterilized tubes are packaged with caps attached

Serological Pipets

GENE Mate®

- Manufactured from virgin polystyrene
- Certified non-cytotoxic and pyrogen-free, sterile
- One-piece construction eliminates sample hang-up and common mouthpiece/tip breakage on all sizes
- Graduation accuracy: ±1.5% for precise dispensing with reference line for proper positioning of the pipet aid
- Color-coded cotton plugs: non-toxic, for easy pipet identification
- Individually wrapped packaging: one-side paper, one-side plastic

Platinum 384-Well PCR Plates

GENEMate

Our most universal 384-well PCR plate!

- Raised rims around wells to increase effectiveness of heat and adhesive seals
- Automation-friendly skirt for labeling and bar-coding
- PCR applications: Fits all 384-well thermal cyclers
- Sequencing systems: Compatible with all ABI PRISM® 384-well Automated Sequencers
- Real time PCR: Compatible with ABI PRISM 7700 and 7900 Sequence Detection Systems
- 50µl maximum well volume
- Sealing mat available to reduce evaporation to < 0.5%

ThermalSeal A™ Film for PCR and Storage

EXCEL

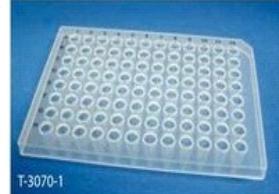

- Advanced 50µm adhesive layer for a strong, secure seal
- Heat-resistant, recommended for -40°C to +125°C
- Certified DNase-, RNase-, and nucleic acid-free
- Can be used with raised-rim PCR plates
- Two end tabs for easy application, tab perforated for easy removal
- One sealing paddle included in each package

T-2417-20 ThermalSeal A Film, 50µm thickness 100/pk \$64.00

SpeedLoader Refill System

An easy-to-use option lets you fill your empty racks quickly and easily. Simply pick up a full wafer with the tip transfer device and place it into the empty deck of the rack. The wafer snaps down on the deck to stay in place and out of your way. The Ultima SpeedLoader system reduces more than 70% of the plastic versus conventional packaging and minimizes storage space requirements.

e-dek™ Pipet Tips

e-dek™—an Enviro and Ergo Friendly System
Environmentally Sensitive Packaging

Two materials give you the best of everything:

- Soft, TPE material for the best seal
- Rigid, clear polypropylene for the straightest tip

e-dek paperboard racks:

- Easy to recycle—compatible with most existing paperboard recycling programs
- Used racks require minimal storage space—just flatten and recycle
- Manufactured from paperboard sourced from sustainable forests
- Soy or water based inks used for printing
- Less weight, reduced energy consumption for shipping

Gel Loading Tips

GENE Mate®

MultiFlex™ are our larger volume microcapillary tips designed to fit standard 200 μ l pipettors. The flat beveled end of the 0.17mm and 0.37mm OD versions make them ideal for gel loading or other discreet sample handling and manipulation. The round capillary version is ideal for SDS-PAGE gels. Each tip features a graduation at 5 μ l. At a length of 83mm, these tips are ideal for reaching into narrow sample vessels, tubes, and plates.

<i>Universal Fit, 20-200μl</i>		<i>Volume Capacity</i>	<i>Qty.</i>	<i>Price</i>

Drosophila Vials

GENEMate®

- Premium grade polystyrene, K-Resin or polypropylene
- Tray pack or bulk pack configurations
- Tray pack 10 x 10 row configuration is great for quick, effortless filling
- Layered, open-end orientation on bulk packs for convenient handling

Polystyrene fly vials offer glass-like clarity for excellent visibility.

Polypropylene fly vials are fully autoclavable. Virtually indestructible fly vials offer good clarity and cost savings.

K-Resin fly vials offer glass-like clarity and rugged durability. This unique material is highly flexible, virtually unbreakable and scratch-resistant. Therefore, K-Resin are an excellent choice for shipping Drosophila.

Ident-i-Plug®

Ident-i-Plugs are reusable and leave no clinging fibers like cotton plugs. They provide a snug fit, yet permit free air flow. Plugs are ideal for use with Drosophila vials.

LABXPERT™ Portable Lab Label Printer

Imagine a lab printer designed to think like you...

With Brady's LABXPERT Laboratory Labeling System you have a powerful yet affordable tool at your fingertips! Produce legible, professional-looking labels for your lab samples, while drastically reducing the time it actually takes to label.

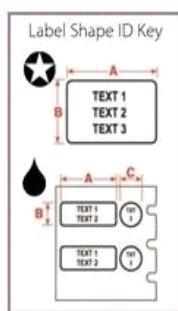

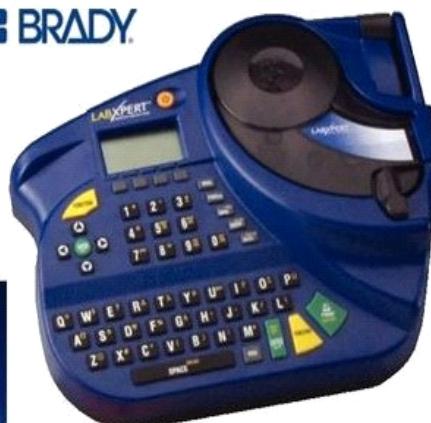

Increase the efficiency of labeling in your lab with:

- Pre-sized labels customized to fit vials, tubes, and slides
- Auto-serialization—produce 40 labels in under two minutes—that's 80% faster than handwriting!
- One-touch Time & Date stamping
- Built-in bar coding
- Over 140 lab-specific Greek, research, and safety symbols.

Add Identilab™ software for even more capabilities

- Easy interface with spreadsheets and many other programs
- Increase your text options with more fonts, symbols, and sizes
- Work in an easy "click and drag" environment

Brady IP™ Printer System

Load. Click. Print.

Smart Cell Technology

- Printer communicates with software, materials, and ribbons making printing simple
- Load Brady IP enabled material and the software recognizes it
- Visually check the printer and material information using the status monitor on your PC

Intelligence by Design

- No more calibration for notched, gapped, or continuous material
- Center justified material guides keep a consistent print image
- Easy loading with straight feed path

Intuitive LCD Display

- Correct material/ribbon match displayed
- Sensor position visually shown
- Monitors material and ribbon usage
- Intelligent trouble shooting with corrective action

Printer is ready for work

- Thermal transfer, 4" wide, 300dpi or 600dpi
- Lightweight, flip top, compact design
- USB, serial and 10/100 ethernet is standard
